

FREE STUDENT MEMBERSHIP

The Kent Archaeological Society, one of the oldest societies in the country dedicated to history and archaeology, is inviting students aged 18 and over who are studying at any further or higher education institution anywhere to join free of charge for the 2021 membership year.

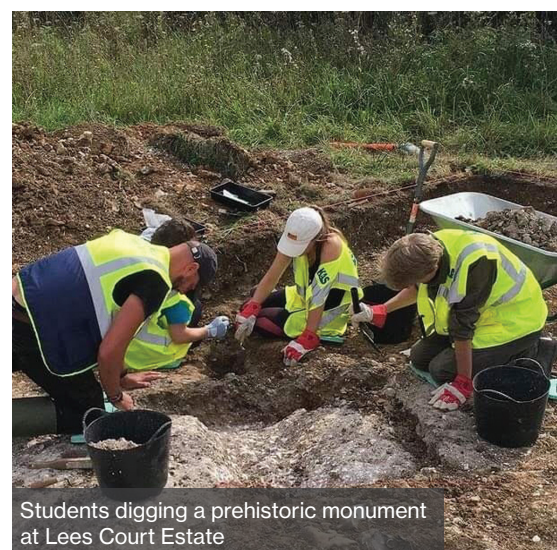

Society members can access the resources, expertise and equipment to carry out their own research, take part in archaeological digs, indulge their interest in artefacts and help to curate and record the wealth of historical artefacts and material which tells the history of the illustrious county of Kent. Student members will receive electronic versions of the KAS Magazine and the county's archaeological journal *Archaeologia Cantiana* and enjoy all the regular membership benefits.

The Society is a registered charity which works with individuals, institutions and local groups to support volunteer activities and heritage projects throughout the county. Professor Kerry Brown, the Society's President-elect, extended his welcome to new members:

"As the Kent Archaeological Society moves into another decade, it is taking measures to ensure that its charitable work can continue well into the future and that it has the resources and talent to achieve its aims. There are educational initiatives, volunteering opportunities and activities planned, subject to coronavirus conditions, for the next year that will enable more young people to actively contribute to the rich tapestry of Kent's heritage and to enable them to compliment their education by gaining new skills and experience that they will carry into their professional lives." (Kerry Brown – KAS President-elect)

Those wishing to take advantage of the student membership or support the Society by becoming Full, Institutional or Family members please visit the website below to apply or to read further information about membership.
